PROFILE

Data Analyst / BI Analyst with an MSc in Advanced Computer Science from the University of Exeter and practical experience in SQL, Python, Power BI, Excel, dashboarding, data cleaning and reporting automation. Experienced across regulated healthcare systems, customer operations and full-stack delivery, with a track record of reducing manual workload, improving reporting processes and communicating technical findings to non-technical stakeholders. Seeking data analyst, BI analyst, junior analytics or data operations roles across the UK.

CORE SKILLS

- Data & BI: SQL, Python, Pandas, NumPy, Power BI, Excel, data cleaning, KPI reporting, automated reporting
- Healthcare Systems: Epic EPR, NHS clinical workflows, service desk operations, information governance, patient data environments
- Analytics & ML: scikit-learn, TensorFlow, NLP, classification models, feature selection, model evaluation, clinical data interpretation
- Databases & Development: MySQL, PostgreSQL, SQLite, Django, REST APIs, ReactJS, JavaScript, TypeScript, Git/GitHub
- Ways of Working: Agile, Jira, incident management, stakeholder support, documentation, escalation, process improvement

WORK EXPERIENCE

Service Desk Operator - Epic EPR & Clinical Systems Support | NHS | Exeter, UK **Mar 2026 - Present**

- Support users in a high-pressure, regulated digital systems environment, resolving access, configuration and usage issues across Epic EPR and related workflows.
- Maintain approximately 98% first-line resolution across 20-50 daily contacts, applying structured triage, documentation and escalation processes.
- Log, categorise and prioritise incidents accurately, helping identify recurring technical issues and improve operational response processes.
- Communicate clearly with clinical and non-technical stakeholders, translating technical problems into practical actions and timely updates.
- Built strong understanding of data quality, information governance and digital workflow reliability within a live operational environment.

Data Analyst & Front-End Development Intern | Virtual-E | Remote **Mar 2025 - Sep 2025**

- Cleaned, transformed and analysed operational datasets using SQL and Excel, translating findings into clear, actionable insights for technical and non-technical stakeholders.
- Developed interactive Power BI dashboards to monitor business KPIs and automated recurring reporting workflows, reducing manual workload by 30%.
- Built and optimised REST API endpoints for data retrieval and booking management, improving system response performance by 20%.
- Designed and delivered a responsive car rental web application using ReactJS and Django, integrating booking, payment and user management features.
- Contributed to sprint planning, stand-ups, code reviews and documentation within an Agile team using GitHub for version control.

Customer Operations Assistant | Shell & Tesco | Exeter, UK **Nov 2023 - Mar 2025**

- Served high volumes of customers in a fast-paced retail environment, handling approximately 300–400 customer interactions per shift while maintaining professional service standards.
- Promoted the Shell Go+ loyalty programme and achieved a 19% success rate, ranking second highest in the region.
- Managed till operations, stock checks, replenishment, and daily reporting tasks with attention to accuracy and process compliance.
- Worked as an online shopping assistant at Tesco, picking and preparing customer orders from the shop floor while maintaining a pick rate of approximately 203 items per hour.

PROJECTS

Smoking Status Detection System - MSc Project

- Built and benchmarked Random Forest, SVM, Decision Tree and Neural Network models to predict smoking status from demographic and clinical data.
- Applied feature selection, hyperparameter tuning and evaluation using accuracy, precision, recall and F1-score, demonstrating health analytics and model interpretability skills.

Automated Vehicle Type Recognition System - University of Exeter Dissertation

- Built a real-time image classification pipeline using 8,500+ annotated images, benchmarking Faster R-CNN, RetinaNet, SSD VGG-16 and SSD MobileNet V3.
- Achieved up to 45 FPS inference speed using SSD MobileNet V3, showing ability to compare models systematically and optimise for practical deployment.

PUBLICATION

Online Exam Proctoring System - IJARSCT, 2023 | Python, OpenCV, YOLO, Django, Machine Learning

- Developed an AI-based remote examination monitoring system using facial recognition, object detection, audio monitoring and behavioural analysis.
- Implemented YOLO-based object detection and event logging within a secure backend architecture.

EDUCATION

MSc Advanced Computer Science, Merit | University of Exeter | Exeter, UK **Sep 2023 - Sep 2024**

- Relevant modules: Machine Learning, Learning from Data, Fundamentals of Security. Dissertation: Automated Vehicle Type Recognition System.

B.E. Information Technology, 8.45 CGPA | Saboo Siddik College of Engineering | Mumbai, India **Aug 2019 - Jul 2023**

CERTIFICATIONS

- AWS Cloud Foundations (2023); AWS Cloud Computing Semester 1 (2023); British Airways Data Science Virtual Experience Program - Data Analyst (2025)
